

Teleschool Week 7: Second Grade

Please use the following weekly plan to complete assignments at home while school is closed. Each day your child will need to do 25 minutes of Reading/Writing, 25 minutes of Math, and 10 minutes of specials.

<u>Monday</u>	<u>Tuesday</u>	<u>Wednesday</u>	<u>Thursday</u>	<u>Friday</u>
<u>Reading and Writing</u>				
<p><u>Weekly Read Aloud:</u> Use this read aloud to help guide you in your own nonfiction reading at home. You can view this as many times as you'd like, but at least once before the end of the week. Click here: Night Sky</p> <p>Additional Read Aloud: Butterflies Part 2</p>				
<p>Today I want to teach you that readers STOP and Think about the facts they are learning!</p> <p>Watch the Lesson: Lesson 1</p> <p>Watch the Lesson Lesson 2</p> <p>After watching the lessons, use a NF book from home to practice stopping and thinking</p>	<p>You will complete the same activity from yesterday to continue practicing stopping and thinking. Remember, this is so important because it helps us as readers to check-in and make sure we are remembering what we are learning and understanding what we are reading.</p>	<p>Today, I want you to add more to the chapters you already have written to make it more interesting! Here is a chart to help you to add more! Also, if the authors that wrote your nonfiction books at home do something cool, try it in your book!</p> <p>Watch the Lesson: Writing Lesson</p>	<p>Today, I want to teach you one more way you can teach your reader. You can write a <u>little</u> story to teach!</p> <p>You can add a small story inside a chapter to teach your reader.</p> <p>Watch the Lesson: Writing Lesson</p> <p>Read Aloud: I Am Amelia Earhart</p>	<p>Complete the assignment "Animal Meals" for a grade.</p> <p style="background-color: yellow;">Turn this in for a grade.</p> <p>**If you don't have a printer, please just have your child write out the answers on a piece of paper at home, or type into a word document/email. You can send a picture</p>

<p>about the facts you are learning. This is important to make sure you are remembering the facts and keeping track of everything a book is teaching you!</p> <p>*Complete this activity with someone so you can turn and talk to.</p> <p>While you are reading a NF book at home, stop after every page and think about the facts you learned. You can talk to someone at home and share the facts, or you can write down 1 fact from each page after you stop and think.</p> <p>If you do not have nonfiction books at home, use the <u>Frog and Toad</u> Fact Page attached to the plans and on the website to practice stopping and thinking- stop when you get to a new heading to think about the facts you learned. Write down 1</p>	<p>*Complete this activity with someone so you can turn and talk to.</p> <p>While you are reading a NF book at home, stop after every page and think about the facts you learned. You can talk to someone at home and share the facts, or you can write down 1 fact from each page after you stop and think.</p> <p>If you do not have nonfiction books at home, use the <u>Artic Animals</u> fact page attached to the plans and on the website to practice stopping and thinking- stop when you get to a new paragraph to think about the facts you learned. Write down 1 fact you learned from each paragraph.</p>	<p>Assignment: Go back to add more to what you already wrote to spice it up.</p> <ul style="list-style-type: none"> • Comparisons • Answer questions readers may have • Definitions • labels • Add descriptions 	<p>Example: My book is about Things to Do Outside.</p> <p>Here are my chapters: Chapter 1: Games to Play! Chapter 2: Dress up! Chapter 3: Hunt!</p> <p>Here is my chapter 2. Notice where I added a little story and I added a list! After you read my chapter, try it in your book!</p> <p><u>Dress Up!</u> <i>Are you tired of playing tag outside? Well, you can pretend to be different people!</i> <i>You could pretend to be a...</i></p> <ul style="list-style-type: none"> • Mailman • Construction worker • Gardener • Princess <p><i>Just find some dress up clothes and get into character!</i> <i>When I was bored at home and didn't know what to do. I found some blue clothes and my mom's old bag. Then, I got some</i></p>	<p>of their work to my email or upload into SeeSaw.</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------

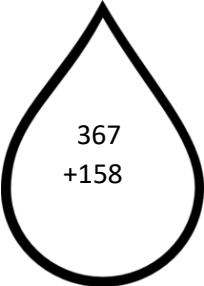

<p>fact you learned from each heading. The first heading is "Lifecycle"</p>			<p><i>paper and markers. I cut the paper into rectangles and wrote notes and drew pictures on the pages. On the other side, I wrote my name and my neighbor's name. Then, I became a mailman! I delivered mail to all my neighbors!</i></p>

Math

Unit 7 in Mathematics is a review unit. We will take this time to review the most common misconceptions with our 2nd grade standards. This week we will review strategies to solve three-digit addition word problems.

Please click the link to watch the weekly lesson on three-digit addition word problems. Feel free to watch as many times as you would like. [Three-Digit Addition](#)

<p>Today we will be reviewing the strategy we have learned to solve three-digit addition sentences. Click Here Watch the video attached. After reviewing the break apart or expanded notation video. Please complete the assignment attached called "Break Apart" to practice the skill.</p>	<p>Today we will practice using the break apart strategy to solve addition sentences in word problems. Watch this video Click Here After watching the video see the attached polka dot task cards. The cards have polka dots on them. Complete cards 1-12 for practice. Use any strategy</p>	<p>Today continue to practice answering word problems with three-digit addition. Complete the assignment attached called "Dino Math". After answering each question, create your own three-digit addition word problems using the sentences below: 436 + 125 = 812 + 145 = 267 + 229 =</p>	<p>Watch the Khan Academy video attached to practice another strategy to solve three-digit addition word problems. Click Here After watching the video link above, complete the assignment attached called "3 Digit Word Problems" This is a graded assignment. After</p>	<p>Fun Friday! Using the raincloud and water droplets page attached to create a thunderstorm of addition sentences! Write three-digit addition sentences vertically on each raindrop. Solve each problem and make a thunderstorm by</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<p>THIS IS A GRADED ASSIGNMENT</p> <p>If you are unable to watch the video. Please use the sheet called "Break Apart" and use the example at the top to help review with your student how to solve three-digit addition problems.</p>	<p>you would like to solve these cards.</p> <p>If you are unable to view the video, please complete the polka dot task cards 1-12.</p>	<p>For example: Max had 436 toy cars in his toy box. On his birthday his family gave him 125 more toy cars. How many cars does he have now?</p> <p>Write your own three-digit word problems like the example above. Then solve each problem.</p>	<p>completing please submit to your teacher.</p>	<p>adding lightning and more detail to the page!</p> <p>Example:</p>
